INSPECTION CERTIFICATE FOR QUALITY AND QUANTITY

We hereby report as follows in compliance with the instructions we received from our principle, our surveyors performed the following operations at manufacturer's plant in Marmaraereğlisi/ Tekirdağ

Description Of Goods: Newly produced hot rolled deformed reinforcing steel bars in length of 12 meters +/- 100 MM , in standard quality ASTM A 615 grade 40 once folded.

Control of Quality: Our surveyors periodically supervised the tests of the above cargo at the laboratory. Representative samples were drawn from the cargo and measurements were made. Upon various tests carried out it has been found that the measurements of each drawn samples were complying with related standard. Mechanical properties and chemical analysis were found complying with standard.

The survey reports are attached. Whilst we believe the surveyor(s) are competent neither we nor the Corporation of TSE can accept responsibility or liability in respect of attached reports

Packing: Packing in bundles about 2 MT, with uniformed piece counted bundles which are secured strapped at least 4 times by steel wire rods.

Quantity: The following quantities have been shipped.

Total Quantity: 9.541,996 M/TONS (THEORETICAL WEIGHT)

Total No of Bundles: 4856 BUNDLES
